

Summary

Frontend Software Engineer with 2+ years of experience building, deploying, and maintaining production web applications using React, TypeScript, Next.js, JavaScript, and Redux Toolkit. Experienced across FinTech, GovTech, SaaS, and digital learning platforms, developing workflow-driven systems for financial transactions, payments, accounting, user and business management, inventory, approvals, reporting, verification, and role-based access control. Skilled in translating business requirements and Figma designs into scalable, responsive interfaces, integrating REST APIs, managing complex application state, implementing secure permission-based workflows, and optimizing performance. Also experienced with Node.js, Express.js, PostgreSQL, and MySQL, enabling effective contribution across the full software development lifecycle.

Core competencies

React & Next.js	Workflow & Approval Systems
TypeScript & JavaScript (ES6+)	Responsive & Accessible UI Development
Frontend Architecture & Reusable Components	Performance Optimization
Redux Toolkit & State Management	Data-Driven Dashboards & Reporting
REST API Integration	Production Deployment & Maintenance
Authentication & Role-Based Access Control	FinTech, GovTech & SaaS Applications

Experience

Software Engineer - Frontend <i>Yoya Technologies Limited Uganda</i> Tech: React, TypeScript, JavaScript, Redux Toolkit, REST APIs, Django	Sept, 2025 - Present
- Develop and maintain production web applications supporting financial services, government revenue administration, and municipal operations, serving 100,000+ users and facilitating over UGX 100M in daily revenue collections. - Build complex workflow-driven frontend modules for user and business management, financial transactions, inventory, payments, accounting, reporting, verification, amendments, transfers, and multi-level approvals. - Develop accounting and financial reporting interfaces, including Chart of Accounts, General Ledger, Trial Balance, Balance Sheet, and Profit & Loss. - Implement role-based access control and permission-aware workflows, ensuring users can access functions and approval stages according to their assigned responsibilities. - Integrate React applications with Django REST APIs to deliver real-time, data-intensive workflows, handling validation, authentication, and complex business process interactions. - Build reusable React/TypeScript components and scalable frontend patterns to improve consistency and maintainability across applications. - Implement Redux Toolkit for complex application state management across multi-module enterprise workflows. - Optimize application performance using lazy loading, code splitting, and frontend optimization techniques, ensuring fast load speed of less than 2 seconds for the pages. - Translate business requirements and Figma designs into responsive, accessible, and production-ready interfaces.	
Software developer, <i>AI Smartual Learning, Malaysia.</i> Tech: React, JavaScript, Redux Toolkit, Node.js, Express.js, PostgreSQL	Sept. 2024 -Sept, 2025 <i>Remote</i>
- Developed and maintained frontend features for a digital learning and content monetization platform serving learners and content creators. - Built interfaces for course management, content publishing, creator dashboards, and learning workflows using React and Redux Toolkit. - Integrated REST APIs with Node.js/Express.js backend services to support user, content, and learning operations. - Implemented communication workflows, including automated email notifications and user-facing status updates. - Collaborated with distributed product and engineering teams across multiple time zones to deliver and support production features. - Contributed to testing, bug resolution, production releases, and continuous platform improvements.	
Software developer, <i>Jeba Pesa Uganda Limited</i> Tech: React, JavaScript, Redux Toolkit, REST APIs	Jan. 2025 - April 2025 <i>Hybrid</i>
- Developed responsive frontend features for a digital financial platform supporting crowdfunding, SACCOs, savings groups, financial tracking, and credit-building services. - Built financial dashboards and data-driven interfaces for managing financial activities and user information. - Integrated REST APIs to retrieve and manage financial data and support end-to-end user workflows. - Implemented reusable React components and Redux Toolkit state management to improve application maintainability.	

- Optimized interfaces for **mobile responsiveness, accessibility, and usability** across different devices.

Selected Production Projects

Integrated Revenue Administration System (IRAS) — Frontend Engineer

Yoya Technologies | React, TypeScript, Vite, Material UI, Ant Design, Mapbox GL, Flexmonster

National revenue administration platform used by Ugandan local governments to register taxpayers, assess, bill, collect, and report on non-tax revenue.

- Contributed to a **web application** as part of a 10-developer team, working across registration, assessments, billing, payments, objections, inspections, accounting, and administration.
- Built **30+ management and analytical reports** with server-side filtering, drill-downs, visualizations, and Excel/PDF exports.
- Developed **property valuation, amendments, payment reconciliation, accounting ledger, trial balance, and audit-trail** functionality.
- Implemented administrative workflows, including **role delegation, SLA configuration, scheduled reports, document management, and location verification** using Mapbox GL.

Tayari Loans Management System—Frontend Engineer

Yoya Technologies | React, TypeScript, Ant Design, MUI, Redux Toolkit, Mapbox GL, Flexmonster

Loan management and accounting platform supporting the lifecycle of **motorcycle and e-bike asset financing**, from loan origination through repayment, collections, and financial reporting.

- Built major modules as one of **two lead frontend contributors**, including the end-to-end loan application workflow, restructuring, rescheduling, and multiple application types.
- Developed **20+ financial reports** covering loan books, debtor aging, balance sheets, general ledger, transactions, invoices, overpayments, and asset recovery.
- Implemented payments and collections features, including **bulk payments, installments, penalties, discounts, and defaulter dashboards**.
- Built **role-based access control and financial-period transaction locking**, protecting accounting integrity while allowing authorized overrides.
- Contributed to reusable, metadata-driven form and register components that significantly reduced development effort for new modules.

Smart Parking & Revenue Management System — Frontend Developer

Yoya Technologies | React, TypeScript, MUI, Ant Design, Mapbox GL | Deployed in two Ugandan cities

Municipal parking and revenue management platform covering parking operations, billing, payments, accounting, and field operations.

- Built frontend modules for **street/slot parking, bookings, reservations, coupons, stickers, vehicle clamping, and penalties**.
- Implemented billing and payment workflows supporting **PRN generation, MTN MoMo, Airtel Pay, USSD, QR payments, prepaid balances, reversals, and receipts**.
- Developed **General Ledger, Trial Balance, reconciliation, expenses, requisitions, and automated staff wage/commission calculations**.
- Built granular **role-based access control, JWT authentication, OTP verification, and session security**.
- Delivered KPI dashboards and operational reports covering **occupancy, revenue, agent performance, end-of-day operations, and debtor ageing**, with Excel/CSV export and ad-hoc reporting.

Certifications

- ALX ProDev Frontend Developer - 2025
- Tunga Tech Impact Academy - Fullstack Developer - 2024
- freeCodeCamp - JavaScript Algorithms & Data Structures - 2024

Technical Skills

Languages: TypeScript, JavaScript, SQL

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Docker, Figma, Postman

Specialties: API Integration, RBAC, Responsive UI, Performance Optimization, Workflow & Approval Systems

Education

Makerere University - Kampala, Uganda
BSc Petroleum Geoscience and Production | 2016–2021
Mastercard Foundation Scholar
